Chairperson's Message

A feeling of huge contentment and pride encompasses me, when I look upon Northern Indian Institute of Fashion Technology (NIIFT), having emerged as a leading and reputed Institute of Fashion, developing professionals in the field of Design, Management of Technology.

With its mission firmly in place, NIIFT embarked upon an ambitious agenda of furthering its efforts to become the leading source of Fashion and Marketing education and give to the society budding designers and garment technologists as well as fashion marketing professionals.

NIIFT, strives to attract the cream of students across the globe. We have built an institution with the best of faculty, students and employees. The best of corporate support, and management is also available. We are dedicated to building a pleasant atmosphere in which coexistence is essential to create an intellectual academic community. In order to achieve this objective we have created infrastructure with State of the Art facilities.

Positioned as a multi-disciplinary Institute, we create "Industry ready professionals", both for export and domestic industries as there are huge opportunities emerging for the students to chart exciting careers. Export Houses which are scaling up operations across the world are also greatly contributing their expertise to the Institute. The keen interest of leading international institutes to collaborate with NIIFT goes to prove that NIIFT has emerged as a front runner Institute in the field of Fashion Education.

I, therefore, invite all Garment & Textile related Industries, Export Houses, Retail Units, Established Designers & Leading MNC's to come & select the best of the students NIIFT has produced for their Fashion Industries.

Smt. Vini Mahajan, IAS

Additional Chief Secretary to Govt. of Punjab
Department of Industries & Commerce
Chairperson, NIIFT

Director General's Message

"Coming together is a beginning; keeping together is progress; working together is success".

As one of the Top Fashion Institutes in India, Northern India Institute of Fashion Technology, has been a trend setter in the field of Design, Management and Technology Education. NIFT is continuously striving to provide the best of fashion education. This desire to always strive for excellence also brings a global perspective to all NIFT activities as we incorporate the best academic practices in our Design, Management and Technology Program.

The essence of Design, Management and Technology, is what is taught at NIFT. Professionals who are passionate about their work and are willing to share their expertise to teach the young talent who, once graduated will reach the highest professional levels. At NIFT theory is taught alongside practical, students learn that creativity is a gift to be nurtured, nourished and stimulated continuously, with passion and dedication. It is the passion for the world of Fashion and Design with which our teachers teach the students the finest details.

The best way to start a new career in the right direction is to get a good education. Through Design and Marketing oriented courses like Fashion Design, Textile Design, Garment Manufacturing Technology or Fashion Marketing Management one can get foot into fabulous career opportunities in the rapidly growing fashion industry. The interest may be in Fashion Design, Textile Design, Production, Marketing and Merchandising, Fashion media and promotions or any other type of Fashion related Career, a degree helps one learn the skills necessary to bloom in the fashion industry and also provide the building blocks needed to succeed further in the fashion sector.

NIFT Graduates and Post Graduates are extremely sought after and attract good salaries substantially above the average. Our graduates occupy key roles in a wide swathe corporate enterprise, media and design houses & luxury brands. We are very proud that many of them return to NIFT to share their experience with students. NIFT announces its placement week in April 2017. I invite you for the Campus Placements at NIFT to select the best of the talent and utilize their services to further contribute to the growth of your company.

Sh. Manjit Singh Brar, IAS

Director of Industrial & Commerce, Punjab
Director General, NIFT

NIIFT MOHALI

THE INSTITUTE

To cater to the need of trained professionals in the field of Textile and Garment industry, the Department of Industries and Commerce, Govt of Punjab, established Northern India Institute of Fashion Technology, in 1995. An MOU was signed with the National Institute of Fashion Technology, New Delhi, for guidance and assistance in admission procedure, faculty recruitment and training, as well as curriculum upgradation and planning of courses. Presently the Institute is offering B.Sc. & M.Sc. Degrees from I.K. Gujral, Punjab Technical University, Kapurthala, Jalandhar.

OBJECTIVES

The main objectives of NIIFT are:

- To build and nurture a new generation of professionals and designers, who can help bring changes in the future by helping the Indian Fashion and Garment Industry achieve and sustain global leadership.
- To provide expertise to industry which is instrumental in generating foreign exchange and generating employment.
- To award Degrees, Certificate and other distinctions at various levels to the candidates trained to prescribe standards of proficiency before such awards.

- To undertake selected applied research studies and applications thereof in areas of textiles, fashion and garment industries; particularly material in the requirement of mass production, improved product design and international marketing.

TEACHING METHODOLOGY

Upholding the commitment to excellence, NIIFT provides an excellent learning environment to broaden the mental horizons of its students leading to overall development of their personality. The system consists of classroom lectures, group discussions, case studies, projects, surveys, seminars assignments, presentations and practical demonstrations in simulated industry conditions. These prepare the students to accept the challenges posed by the industry and also improve their decision-making and communication skills.

EVALUATION SYSTEM

Through out the semester the performance of the students is assessed on the basis of regular assignments, projects, presentations, and examination. The development of students is also analysed by their participation in classroom lectures and discussions. All the research and development projects are assessed by the jury comprising of specialist in the area of design, manufacturing and management. The Jury not only judges their performance but also enrich the student's perspective in relevant areas.

THE FACULTY

The faculty is the core competence of NIFT. The members are professionally qualified having rich industry experience. Their pragmatic approach coupled with industrial experience has over the years shaped successful careers of our students. The faculty constantly upgrades their knowledge through regular interaction with the industry and also undertakes research and consultancy projects. The regular learning is further supplemented with series of lectures from renowned academicians and industry professionals.

THE ALUMNI

NIFT is proud of its illustrious alumni occupying significant positions in leading national and international organisations. The alumni have supplemented the growth of this industry by contributing their expertise in the core levels. Over the years, they have shouldered the responsibility as Entrepreneurs, Quality Controllers, Designers, Merchandisers, Fashion Analysts, Production Managers and Coordinators, Store Managers, Logistics Managers, Operation Head, Sourcing and Buying Agents and Faculty in other reputed Institutes. The Institute regularly corresponds with the alumni association and invites the members for regular Interaction with the Students.

PLACEMENT SERVICES

NIFT's Placement cell facilitates on-campus & off-campus placements for graduating students of NIFT to enable them to start their careers in challenging positions. The star employers of NIFT professionals in the past from domestic & export oriented units have been :-

1. Richa Global, 2. Orient Crafts, 3. Triburg,
4. Willian, E. Conner, 5. Active Clothing,
6. Malwa Industries, 7. Nahar Spinning Mills,
8. Vardhman 9. Trident Group, 10. Inditex Ltd.,
11. H&M Ltd. 12. Forever21,
13. Indian Roots (Venture of NDTV),
14. Shingora Textiles Ltd., 15. Satyapaul

Leading designers like Sonal Mann Singh, Shantanu and Nikhil, Manish Arora, Aki Narula and Manju & Boddy Grover have promoted young fashion designers.

RESEARCH AND DEVELOPMENT PROGRAMMES FOR INDUSTRY

Apart from training future designers and technocrats, NIFT also offers its professional expertises in planning, designing, research and development. It associates itself with esteemed organizations for solicitation and planning for future professionals. It has also become a nodal agency of providing the industry with international fashion forecasts and study of trends. To name a few projects undertaken by NIFT are:-

- Training of top level executives from M/s Vardhman Group in all aspects related to shirt manufacturing.
- Entrepreneur Development Programmes (EDPs) in fashion Technology in association with Regional Center for Entrepreneurship Development (RCED) Chandigarh.
- Product Development and improvement of orthotic aids for Tynor Orthotics Ltd., Mohali
- Advanced Vocational Teachers Training in Computer Aided designing of Regional Institutes of Chandigarh.
- Design of the Winter Jackets for the Punjab Police.
- Design and Product Development of Women's suits/Tops/Kurtis in Khadi and Village Industries Commission.
- Development of Khes material in Khadi for Khadi and Village industries Commission.
- Setting up a State initiative Design Centre (SIDC) to help Promote phulkari in Punjab.
- Training of the Employees of Khadi Emporium.
- Project on Self Entrepreneurship in the Field of Garment an Initiative of Government of Punjab.

GBA:-

The Future vision on NIFT, is to make it an internationally reputed Research, Development and Education institute for Textiles and Apparels.

NIFT POSITION IN INDIA

According to a Survey Conducted By "India Today" 2016 NIFT Mohali is at 7th Rank among the topmost fashion colleges of India.

B.Sc FASHION DESIGN *Mohali*

The BSc. Fashion Design Programme at NIFT has earned a well deserved reputation for itself in the industry circles. The garment industry thrives on innovation and foresight, and is constantly on the look out for professionals who can combine creative ideas with the right technical skills. The course meets the need and is perpetually designed to accord full rein to the imaginative flair for the students, harmonized with practically desired systems at the industrial level.

The Knowledge imparted through the course is based on "learning doing" The Synergy in the course is obtained through textual and practical conceptualizations. Inputs from the leading professionals from time to time enable the students to keep abreast with the current trends in the garment industry. The Students are also exposed to regular visits to industry, fairs, seminars, fashion shows etc. besides, the students are exposed to actual work environment through field projects like craft survey & its documentation and the Industry Internship Programmes.

No. of Graduating Students 55

No. of Students for Placement 46

The Curriculum

The entire emphasis is on creation of promising designers made possible by extensive exposure to latest machinery and equipment, Visual resources and on the job experience during the industrial training. Thus the curriculum is designed such that there is a gradual but thorough development of a student into a professional designer.

Phase I : Development Of Basic Skills

During this phase the students are imparted basic such as Elements of Fashion, Elements of Textiles, Elements of Design, Sketching, art Appreciation History of Costumes, pattern Making, Draping, garment Construction, Textile Science, yarn Craft, study of Crafts & Introduction of Photograph.

Phase 2 : Development of design Skills

During this phase the aesthetic as well as the creative skills are cultivated and the students are trained in the disciplines like: Basic Design, Fashion Illustration, Surface Development, Art Portfolio, Computer Application, Design Collection and its Manufacturing process.

Phase 3 : Development of Professional Skills

After acquiring the basic skills, their proficiency is enhanced through subjects like Advanced Pattern Making, Grading, Garment Construction, Design Development, Introduction to Management Concepts, Apparel and Visual Merchandising, Computer Aided Design, Range Development, Fashion Forecasting and Design, Collection. The Curriculum also imbibes some innate features for the development of skills of the students.

Design and Creativity

This is stressed upon throughout the student training period. The students dwell in an atmosphere of inspiration aesthetics and liberty of concepts. The students are motivated to work on story lines based on international trends and forecasts. They are encouraged to keep their roots in traditional Indian textiles and techniques.

Field Visits

Students are taken for visits to industrial establishments and international fairs so as to broaden their perspective of the garment industry.

Term Garment

It is simulation of the commercial Client demand in which

students undertake practical exercise, to evaluate their design creativity, pattern making skills and quality of construction. Thus they understand the qualitative and logistics of the entire process of garment manufacturing.

Presentation/Seminars

Along with the garment presentations, the students are given opportunity to present the current topics related to the garment industry in the form of classroom seminars and presentations, which keeps them abreast with the latest developments and techniques followed in the industry.

Important Features of the Curriculum

Craft Documentation

Craft documentation forms an important part of the curriculum of Fashion Design course in the second semester. Here the students undertake extensive excursion to study and document the rich & diverse aesthetic heritage of our country. The survey enables the students to interact with the craftsmen in their habitats and get the first hand knowledge of the art and crafts.

Industry Internship

After the fourth semester the students are required to undertake a six weeks industry internship programme wherein they work either in the industry or under a Designer. The main objective of this exercise is to enable the students to get an insight into the real working environment.

Graduating Design Collection Show (ANUKAMA)

The final collection is a virtual reality to the hard work and toil of students of the final semester. The collections encapsulate the technical accomplishments, the creative flair and philosophy behind the concepts and designs. The process of making the collection starts from inspiration to conceptualization followed by sourcing, developing the prototype, sewing and accessorisation of the final ensemble. The final presentation carries with them the inspiration and impulses of the budding designers. The collections are adjudged by a jury comprising of designers and industry experts.

Career Opportunities

The course prepares the students to pursue career as Designers, Design Managers, Fashion Stylists, Creative Pattern Makers, Illustrators, Costume Designers, Fashion Merchandisers, Fashion Forecasters, Teachers and Entrepreneurs to name a few.

(Final Design Collection Show of Fashion Design Department)

B.Sc FASHION **KNIT DESIGN** Ludhlana

No. of Graduating Students 39

No. of Students for Placement 36

The Fashion Design Knits (FDK) Program is a specialized Program which caters to the requirements of Knitwear Industry. The FDK Program at NIIFT is structured with know-how and identity close to this very exclusive area of fashion products. It has well defined exercises in design methodology in knitwear apparel and products with material knowledge to respond to the requirement of specific target markets. The multidisciplinary approach includes inputs ranging from skill development, conceptualization, technical understanding and management skills. Students apply their classroom learning to industry-simulated environments, and undertake industry internship for flat and circular knitting to hone their skills. The Program culminates with the design collection at the end of the 6th semester.

CURRICULUM

The entire emphasis is on creation of promising designers which is made possible by extensive exposure to latest machinery and equipment, visual resources and 'on the job' experience during the Industrial training. Thus the curriculum has been designed to create well-rounded professionals equipped to handle the challenges of circular and flat-bed knitting in the domestic and export fields. They can pursue careers as Designers, Merchandisers, Production Managers and Quality controller etc.

PHASE 1: DEVELOPMENT OF BASIC SKILLS

For a stable foundation on issues relating to the industry, the students acquire the design skills such as Elements of Design, Elements of Fashion, and Fashion Art etc. Emphasis is also on Computer Application, Traditional Textiles, Surface Techniques, Basic Weaving & Knitting Skills, Pattern Making & Construction, and History of Costumes.

PHASE 2: DEVELOPMENT OF DESIGN SKILLS

The thrust is on giving specialized inputs in all the essential subjects such as Design Process, Thematic Approach to Design, Draping, Fashion Art & Illustration, Pattern Making and Garment Construction, Computerized & Circular Knitting Techniques, Product Realization, and Marketing & Merchandising, Production Planning & Control etc.

PHASE 3: DEVELOPMENT OF PROFESSIONAL SKILLS

In this semester, students will undertake a number of elective subjects such as Buying & Merchandising, Quality assurance in Knits, Processing Techniques etc, to fine tune their understanding of the industry and also an independent research based project. In the final semester, students will undertake a Graduation Project with an industrial client, export house, or a designer. During this period the students will be required to work on the brief given by the sponsor. The Program will culminate with a Design Collection showcased on the ramp.

DESIGN AND CREATIVITY

This is stressed upon throughout the student's training period. The students dwell in an atmosphere of inspiration, aesthetics and liberty of concepts. The students are motivated to work on story lines based on international trends and forecasts, yet encouraged to keep their roots in traditional Indian textiles and techniques.

FIELD VISITS

Students are taken for visits to industrial establishments and fairs so as to broaden their perspectives of the garment industry.

TERM GARMENT

It is a simulation of the commercial client demand in which students undertake practical exercise, to evaluate their design creativity, pattern making skills and quality of construction. Thus they understand the qualitative and logistics of the entire process of Garment manufacturing. The current topics related to the garment industry in the form of classroom seminars and presentations, keeps them abreast with the latest developments and techniques followed in the industry.

Important Features of the Curriculum

INDUSTRY INTERNSHIP

After the 2nd semester and after 4th semester students apply their classroom learning to industry-simulated environments, and undertake 4 weeks and 6 weeks industry internship respectively for flat and circular knitting to hone their skills. The main objective of this exercise is to enable the students to get a real working environment.

GRADUATING DESIGN COLLECTION SHOW (ANUKAMA)

The final collection is a virtual reality of the hard work and toil of the students of the final semester. The collections encapsulate the technical accomplishments, the creative flair and philosophy behind the concepts and designs. The process of making the collection starts from inspirations to conceptualization followed by sourcing, developing the prototype, sewing and accessorizing of the final ensemble. The final presentations carry with them the inspirations and impulses of the budding designers. The collections are adjudged by a jury comprising of designers and industry experts.

CAREER OPPORTUNITIES

The course has been designed to create well rounded professionals equipped to handle the challenges of Knitted Fabric and Garment Design & Development for domestic & export markets. They can pursue career in the key decision levels as making positions at various Entrepreneurs, Brand Managers, Fashion Co-ordinators, Merchandisers, Production Managers, Creative Managers, Quality Controllers.

SUVYAN

(A Final Design Collection Display by the Students of Textile Design)

B.Sc. Textile Design (Mohali)

Textile, one of India's core segments, is now gaining fervor both in the export and the domestic market. The changing taste of consumer, aided by higher disposable incomes, has spun a new market for these products Worldwide.

The BSc. Textile Design programme is therefore geared to cater to the growing market demand for TEXTILE PROFESSIONALS for innovative design solutions, creative woven structures, blends and colors. It also aims to nurture their design skill and develop the 'DESIGN' attitude of the students.

Through discovering the vast range of applications for textile, the students are encouraged to realize a target market for their designs and strong emphasis is placed on the visual research, development of ideas and experimentations on the creative process. Craft Documentation, Live projects and Internship with various Design companies and Rural Segment Industry will address professionalism and employability by assisting students in considering their chosen career path.

No. of Graduating Students 55

No. of Students for Placement 48

Curriculum

The main focus of the course is on the textile design of fashion, interiors and related field enabling a cross-fertilization of ideas and possible collaboration by exploring the areas of stitchery, mixed-media, print, knits, weaves, CAD and Nedgraphic. It also makes students appreciate the multi-disciplinary nature of design. Planning skill are developed through analysis of fashion trends, along with study of marketing and global market analysis.

The future textile designer thus learns to develop collections materials, textile structures, decorative motifs, colors range and possible finishing details.

Phase I

In the first year, the students are introduced to the Fundamentals of Design, they develop their sense of color, light, shape, texture and form. It also includes study and exploration of the properties to woven, knitted, printed and embroidered textiles

Phase 2: Development of Design Skills

In this Phase, the main emphasis is on concept development in dialogue with material and technique. In depth knowledge of Weaving Skills, Chemical Processing, Dyeing, Printing, Fashion Studies and Traditional Embroideries are an integral part of the curriculum. The students also become familiar with the principles of marketing and planning. Knowledge of computers as a creative design tool for textile design students is also stressed upon.

Phase 3: Development of Design and Creative Project

During this phase the students with tutorial guidance, negotiate a personal programme of study and are concept to final stage. A dissertation is a requirement of the final award in line with the main study programme.

The course encompasses the major areas of specialism within the textile field, including woven and constructed textiles, as well as knitted and embroidered textile.

Project Works

The students are encouraged to undertake client based project. This equip students with the knowledge and practical design experience to channel their creative and individual skills into self-initiated and commercial applications.

Industrial Visits

Field visits to industrial establishments and fairs are a regular feature which enables the students to understand to understand and broaden their knowledge of textiles and textile based products besides learning the actual working of the textile industry.

Workshops

Industrial experts are regularly invited to give special inputs on various areas of textile from fiber to fabric to design in the form of workshops and lectures. This give students a platform to interact with these industrial experts and get first hand information on latest developments on design and technology.

Important Features of the Curriculum

Craft Documentation

Craft documentation forms an important part of the curriculum of textile course in the second semester. Here the students undertake extensive excursion to study and documents the rich and diverse aesthetic heritage of our country. The survey enables the students to interact with the craftsmen in their habitats and get the first hand knowledge of the art and crafts.

Industry Internship

After the fourth semester the students are required to undertake a six weeks industry or under a well known textile designer. The main objective of this exercise is to enable the students to get an insight into the real working environment

Graduating Design Collection Exhibition (Suvyan)

The mainstay of the BSc. Textile Design Programme is its primary link with the industry through the degree project of the final semester students. These Students work with an industrial client for a period of nearly 5 months. This results in the development of individual collections and exhibition of design work in a gallery setting at 'Suvyan'

Careers

This programme equips the students to pursue careers in Textile Mills, Exports Houses, Fashion Designers, Design studios, Industries, Handloom Sector, Power loom sector, Freelance Designer and Entrepreneur

M.Sc. GARMENT MANUFACTURING TECHNOLOGY (Mohali)

Garment Manufacturing Technology is a two year Post Graduate Programme which develops in the students the ability to make intelligent business like decisions with prudence. The program focuses on strengthening of key technological functions of apparel industry and understanding of Industrial engineering and ergonomic techniques. The emphasis is on production planning control and management practices applicable in the apparel industry. The continues interaction with the industry and visits to leading manufacturing units not only create an enriching learning environment for the students but also widen the horizons of their experience. Equipped with competent technical knowledge, the students are able to anticipate and address the concerns and issues of the emerging manufacturing principles.

The basic objective of this programme is to enhance the students perception of the student's perception of the commercial environment and matching it with professional understanding of manufacturing technology, marketing and management principles related to the Garment industry.

No. of Graduating Students 11

The Curriculum

The students of this programme are technocrats equipped to manage all the variable resources of manufacturing unit through rational business decisions. Thus the curriculum is designed in such a manner that all the pivotal disciplines of technology and management are incorporated judiciously through out the learning period.

Phase I : Development of Basic Skills

During this phase the students are imparted basic such as Elements of Fashion, Elements of Textiles, Elements of Design, Sketching, art Appreciation History of Costumes, pattern Making, Draping, garment Construction, Textile Science, yarn Craft, study of Crafts & Introduction of Photograph.

Phase 2 : Development of design Skills

The students are introduced to varied subjects encompassing all the core subjects, such as pattern making, Basic Garment Construction, Garment Production Machinery & Equipment, Textile Science, Basic Applied Science, Dyeing & Printing, Introduction to Knitting, Fabric and Garment Finishing, Computer Science and Information Technology.

Phase 3 : Development of Professional Skills

The final stage of students are also exposed to the modern management practices through the subjects such as Statistics, Industrial Organization and Management Practices, Personnel Management and Industrial Relations, Operations Research, Accounts, Managerial Economics, Trade Documentation, International Finance, Project Management and Research Methodology.

Field Surveys

The students are required to undertake field surveys on diverse topics to understand the forces influencing the garment industry. This enables the students to interact with all the segments of the supply chain and study the relationship

Seminars and Presentations

The students are encouraged to conduct research and analyse topic relevant to the garment industry and make presentations. Such sessions enhance their knowledge besides building up self-confidence in the students.

Industrial Visits and Internship

The students are taken to prominent industries which enables the students to conjunct the theory principles in the actual working environment. The institute also invites experts from the industry to interact with the students.

Important Features of the Curriculum

Industry Internship

The students of this course are required to undertake a 6-8 weeks internship programme in a garment Manufacturing exposer of the work environment of the Apparel manufacturing system. Thus they are prepared to accept the challenges of the industry and can correlate the theory with practice

Seminars, Conference, Trade Fairs

Workshop, trade fairs, conferences and seminars are important elements of the study programme. They also get a chance to work with the faculty on consultancy projects.

Degree Project

In the fourth semester, the students have to work on a degree project taking up topics of concern to the garment industry. The degree project provides a challenging platform for the students to extend and demonstrate their analytical skills necessary for decision making. The projects are continuously monitored by the faculty presentations, eminent professionals from the apparel industry are invited to evaluate the performance of the students.

Scholarship

Recognizing the contribution made by the institute in apparel field, M/s Groz-Beckert Asia Ltd., A leading giant in manufacturing needles has instituted a Scholarship for Garment Manufacturing Technology students, which is awarded on the basis of their academic performance.

Career Opportunities

The GMT trainees can opt for challenging jobs of Production Managers, Export Managers, Merchandisers and Quality Controllers in the Domestic and Export Garment Industry and can also aspire to become budding entrepreneurs by virtue of their steadfast resolve to achieve success.
